

INFLUENCE OF BUSINESS RELATED CO-CURRICULAR ACTIVITY ON THE SOCIAL SKILLS DEVELOPMENT OF ATENEO DE DAVAO UNIVERSITY GRADE 12 ABM, HUMSS AND PRE-EA LEARNERS

99-006

Yzabella Monungolh

1 INTRODUCTION

Business-related co-curricular activities, such as entrepreneurship bazaars, provide structured opportunities for students to engage in practical business scenarios, fostering critical social competencies necessary for professional environments.

2 LITERATURE REVIEW

As a whole, numerous factors influencing the relevant issues associated with the study and its variables have been identified. This has clarified the differences and similarities among the findings in the related literature. Consequently, the emphasis of this study is directed toward those aspects that have been validated by multiple researchers.

- Business-related School Co-curricular Activities
- Major Social Skills
- Learner’s Leadership Abilities
- Role of Learner’s Developed Social Skills

3 METHODOLOGY

- **Research Design:** Qualitative Comparative Case Study
- **Sampling Method:** Purposive Sampling Method (Criteria: has a family business background, a Grade 12 learner, has experienced the business-related co-curricular activity)
- **Research Instrument:** An In-depth One-on-one Interview
- **Data Collection:** Send permission letter, send to validators for validation, gather 1 participant per strand that matches the criteria, brief the participants, interview the participants
- **Data Analysis:** Transcribe data, familiarize the data, summarize of results, report findings

4 IMPLEMENTATION/RESULTS

- Entrepreneurship as a business-related co-curricular activity fosters social skills essential for future careers. These findings highlight the need to integrate entrepreneurship programs into education to enhance students’ interpersonal and professional growth, preparing them for real-world business environments.
- Family influence, real-world business experience, and customer interaction all have an impact on social skills. Family provided the foundation for communication, business experiences facilitated collaboration and problem-solving, and customer interaction increased adaptability and confidence, all of which contributed to their overall social and professional development.
- Despite the challenges in developing social skills, students successfully overcome these difficulties through teamwork, flexibility, and problem-solving. These findings emphasize the value of incorporating entrepreneurship-based co-curricular activities into education to enhance students’ interpersonal and professional abilities.

5 CONCLUSION

Given the nature of BCA, which focuses on starting businesses, it can help create and develop entrepreneurs with experience. This, in turn, can result in employment, job security, stability, and provide more local options for the Philippine market. This can contribute to creating a self-sustaining country by reducing imports.
